### **DETAILED ACTION**

1. This action is in response to applicant's amendment received on 01/10/05.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 7, 9-11 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Roberts (6321739 B1).

Roberts discloses the process including a strip (20 and 40) having a plurality of substrate areas, providing a plurality of alignment marks (e.g. 36, 46 and 48), providing a plurality of cutting marks (e.g. 36, 46 and 48), positioning the saw machine (7 and 17) with respect to the substrate area (col. 3, line 5), cutting each individual substrate areas (Fig. 1) and an encapsulated area 28.

#### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3724

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Roberts et al. in view of Drussel et al.

Roberts discloses the method substantially as claimed except for two substrate strips juxtaposed for cutting. However, Drussel teaches the use of the method of two substrate strips juxtaposed for cutting for the purpose of increasing the production. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Roberts's device by providing the method of two substrate strips juxtaposed for cutting as taught by Drussel in order to increase the production.

### ***Response to Arguments***

6. Applicant's arguments have been fully considered but they are not persuasive. Applicant argues that Roberts does not show "cutting the substrate strip, wherein cutting error that results from each substrate area will not accumulate to the subsequent substrate areas in the substrate strip". However, the statement doesn't further limit the claims as long the operator or controller maintains the proper alignment. In this case, Robert's controller 21 controls the position and movement of the cutting saw relative to the grooves (cutting marks) in order to cut the substrate (see col. 3, lines 3-5). In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e.,

Art Unit: 3724

Roberts makes no mention of the recited feature of cutting along the cutting tracks after the substrate strip has different shrinkage) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
